

Euna Park

euna@kaist.ac.kr · eunamath.github.io

Education

Korea Advanced Institute of Science and Technology (KAIST)

Undergraduate studies, Department of Mathematical Sciences.

Selected graduate coursework

Algebra I–II; Algebraic Topology I–II; Differential Geometry.

Additional coursework

Introduction to Commutative Algebra; Topological Methods in Combinatorics.

Research interests

Higher category theory, homotopy theory and higher algebra, particularly higher Morita theory and descent.

Related interests

Topological quantum field theory, derived algebraic geometry, mirror symmetry.

Reading

Jacob Lurie, *Higher Topos Theory*.
